Ohio Labor Market Information

Labor Market Review

November 1986

Summary. According to the latest household survey, the seasonally adjusted unemployment rate in Ohio fell to 7.2 percent in November, the lowest it has been since March 1980. The national rate, at 7.0 percent, was unchanged from October. Ohio's civilian labor force rose 1.2 percent, to 5,266,000. Total employment increased by 84,000 workers, to 4,887,000. There were 22,000 fewer jobless Ohioans in November, lowering the number of unemployed to 379,000. Nonagricultural wage and salary employment (seasonally adjusted) in Ohio rose 23,000 from October, to 4,559,000 in November, according to the latest employer survey. Significant gains occurred in both the manufacturing and nonmanufacturing sectors. (See page 3.)

Factory Employment. Seasonally adjusted manufacturing employment in Ohio totaled 1,096,000 in November, up 10,000 from October. Much of the gain was due to settlement of labor-management disputes in nonelectrical machinery, primary metals, and stone, clay, and glass products.

Nonmanufacturing. Nonmanufacturing employment increased 13,000 from October, to 3,463,000 in November. All major divisions had greater employment, except mining, which was unchanged. Employment in services was up 6,000.

Over the Year. Ohio's civilian labor force rose by 85,000 from November 1985 to November 1986. Total employment advanced 164,000, while the number of unemployed workers fell 79,000. The unemployment rate dropped from 8.6 percent to 7.2 percent during the period. The U.S. rate remained constant, at 7.0 percent. Nonfarm employment in Ohio was up 129,000 from November 1985. Gains in services and retail trade accounted for nearly nine-tenths of the increase. Declines in durable goods lowered manufacturing employment 23,000.

Factory Hours and Earnings. Production workers in manufacturing industries earned an average of $495.86 per week in November, up $12.33 from October. Their average workweek of 42.6 hours was up .7 hours. Nearly all industries had higher earnings. The most significant were motor vehicles and equipment, metal forgings and stampings, and aircraft and parts.

Benefits and Costs. Initial claims filed under the Ohio Unemployment Compensation Law numbered 67,691 in November, up 5.7 percent from October, but down 14.3 percent from November 1985. Total benefits paid, at $45.0 million, declined 15.3 percent over the month. The average weekly benefit check fell $2.11, to $150.35, while the average weekly number of benefit recipients increased 6,532, to 77,319. At the end of November, there were 193,478 active employer accounts.

Ohio Bureau of Employment Services
Richard F. Celeste, Governor Dr. Roberta Steinbacher, Administrator

Employment Service. The Ohio Bureau of Employment Services helped 37,778 new job applicants in November, down 20.3 percent from October. There were 8,392 job openings received from employers, down 40.4 percent from last month. The Employment Services Division made 18,938 job referrals and 5,775 placements.

BANK ON OBES

Are you having difficulty locating the workers you need? You might be able to solve this problem by putting your job openings in the National Job Bank System through the Ohio Bureau of Employment Services (OBES).

A few facts about the National Job Bank System:

- It is part of the largest computerized network of job openings in the United States.
- It operates on three levels to fill your need for workers: locally, statewide and interstate-wide.
- It can provide national exposure of your job order without cost to you.

For further information, contact your nearest OBES office.

[r]Data for latest month are preliminary, although other months are subject to revision. Subtotals may not add to totals due to rounding. Unemployment rates are computed from unrounded figures. All data exclude military personnel. [2]Changes are computed from unrounded numbers. [3]Percentages are computed from rounded numbers. [4]From the Current Population Survey, a monthly federal survey of approximately 2,500 Ohio households. Estimates represent counts of persons by place of residence, provided by the U.S. Bureau of Labor Statistics. [5]From the Current Employment Statistics Survey, a monthly survey of over 10,000 employers conducted by OBES in cooperation with the U.S. Bureau of Labor Statistics. Estimates represent nonagricultural wage and salary jobs by place of work. Seasonal adjustment factors for the nonagricultural wage and salary figures are published in the January Review. [6]Includes Mining, Construction, and Manufacturing. [7]Includes Transportation and Public Utilities, Wholesale Trade, Retail Trade, Finance, Insurance and Real Estate, Services, and Government.

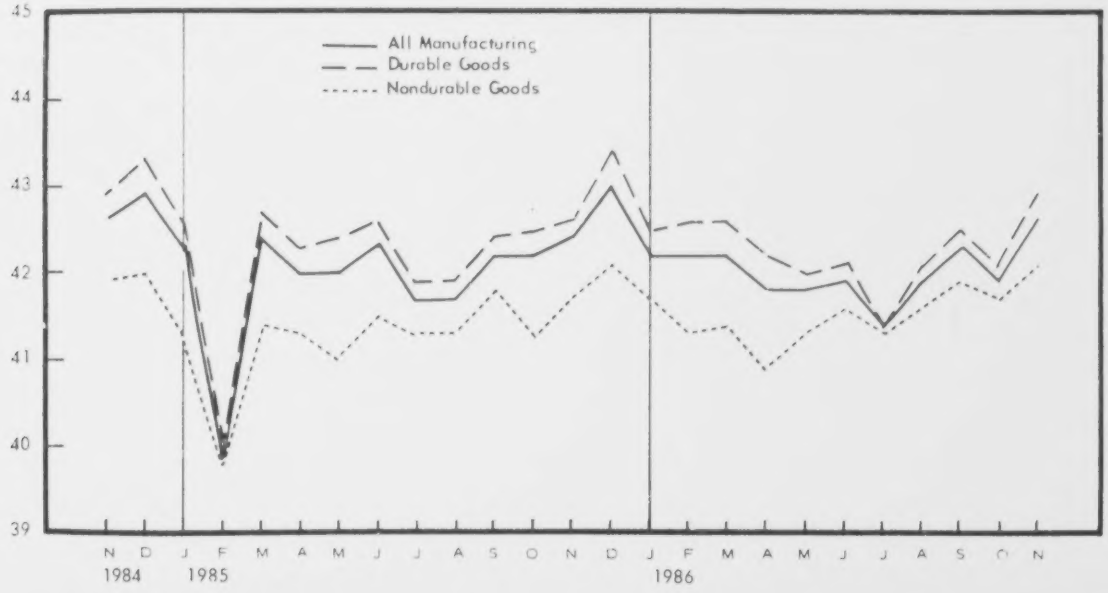
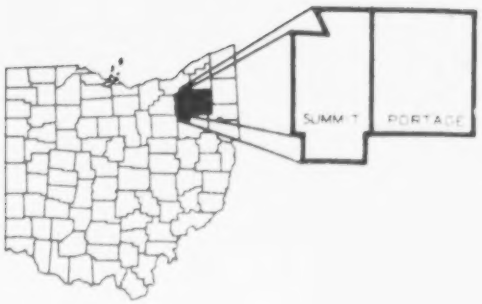
[a]See Technical Notes for concepts. [p]Preliminary. [r]Revised. [b]Based on unrounded figures. [c]Includes miscellaneous manufacturing industries not shown separately, such as manufactures, textile mill products, petroleum and coal products, leather and leather products. [d]Money payments only; does not include the value of subsistence. [e]Includes State universities, State schools for deaf and blind, and the State Library. Excludes hospitals, the agricultural extension service, agricultural research centers, and the Ohio Department of Education. [f]Depressed due to labor/management disputes.

AVERAGE WEEKLY HOURS OF PRODUCTION WORKERS IN OHIO MANUFACTURING INDUSTRIES



AKRON
PRIMARY METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment for the Akron metropolitan area totaled 272,800 in November, an increase of 1,600 from October. Employment in nonmanufacturing advanced 1,400. Retail trade was the primary sector of growth. Manufacturing employment rose 300 to 65,800, due to an improvement in rubber and miscellaneous plastics products. Manufacturing production workers averaged a 43.2 hour workweek, up .2 hours from October. Their average hourly earnings fell $.06 over the month, to $11.31.

Nonagricultural employment in the Akron area increased by 8,900 from November 1985. Growth occurred in all of the nonmanufacturing divisions. Services, retail trade, and construction were the major areas of advancement. Declines in tires and inner tubes, fabricated metal products, and nonelectrical machinery helped lead to the reduction of 1,400 manufacturing jobs.

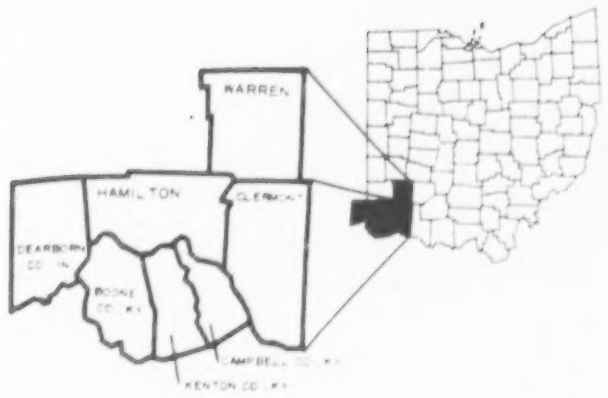
CINCINNATI
PRIMARY METROPOLITAN STATISTICAL AREA



Cincinnati's nonfarm wage and salary employment rose 2,500 in November. Seasonal increases in retail trade accounted for most of the growth. Manufacturing employment increased slightly, to 149,600. Production workers in manufacturing worked an average of 43.5 hours, up one hour. Their average hourly earnings rose $.17 to $10.97 in November.

Nonfarm wage and salary employment increased 28,600 from November 1985 to November 1986. Services and retail trade had the largest gains, although all nonmanufacturing industries were up. Manufacturing employment rose slightly, with losses in nonelectrical machinery overshadowing gains in transportation equipment, chemicals and allied products, and rubber and plastics products.

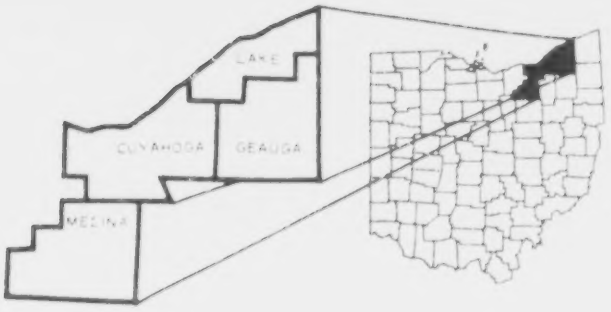
CLEVELAND
PRIMARY METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment in the Cleveland area rose 2,800 from October to 900,200 in November. Nonmanufacturing employment increased 1,700. Gains in retail trade and local schools overshadowed seasonal losses in construction and amusement and recreation services. Manufacturing employment advanced 1,100 to 203,400, due primarily to growth in motor vehicles and equipment, primary metal industries, and rubber and plastics products. Factory production workers earned an average of $11.59 per hour, up $.18 from October. Their average workweek of 43.1 hours was one hour longer.

Since November 1985, nonfarm employment increased 17,500. Noteworthy gains were recorded in retail trade, business services, health services, and finance, insurance, and real estate. Manufacturing employment declined 5,500. Although losses were noted in most manufacturing industries, significant reductions were in nonelectrical machinery, instruments and related products, and fabricated metal products.

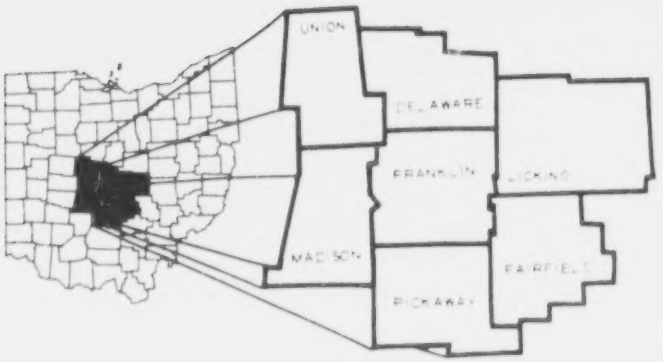
COLUMBUS METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment in the Columbus metropolitan area totaled 662,000 in November, up 3,600 from October. Nonmanufacturing employment rose 2,800 to 557,300. Retail trade had the largest gains due to the holiday season. Settlement of labor-management disputes in stone, clay, and glass products and nonelectrical machinery pushed manufacturing employment up to 104,700. Production workers in manufacturing earned an average of $11.31 per hour, little changed over the month. The average workweek was 41.1 hours, up .3 hours from October.

Nonagricultural employment rose 34,600 from November 1985. The increase occurred in nonmanufacturing with largest gains in services and retail trade. All other nonmanufacturing divisions in the Columbus area also gained workers over the year. Manufacturing employment declined 2,000, with losses recorded in durable-goods industries.

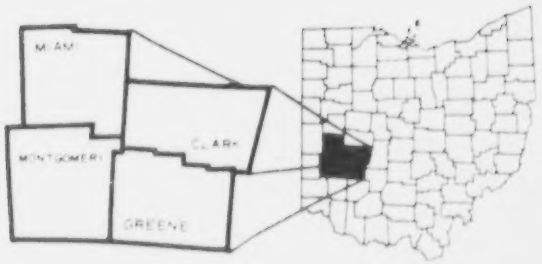
DAYTON - SPRINGFIELD METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment in the Dayton-Springfield MSA, at 432,000 in November, was up 2,000 from October. The increase occurred in nonmanufacturing, especially retail trade, services, and government. Over the month, manufacturing employment remained unchanged at 104,200. Production workers in manufacturing earned an average of $11.93 per hour, down $.04 from October. Their average workweek of 42.4 hours was up .4 hours.

From November 1985 to November 1986, Dayton-Springfield nonagricultural wage and salary employment rose 14,600. All nonmanufacturing industries were up, with services, retail trade, and construction having the largest increases. Manufacturing employment dropped 2,300 over the year, due chiefly to losses in nonelectrical machinery, rubber and plastics products, and metalworking machinery.

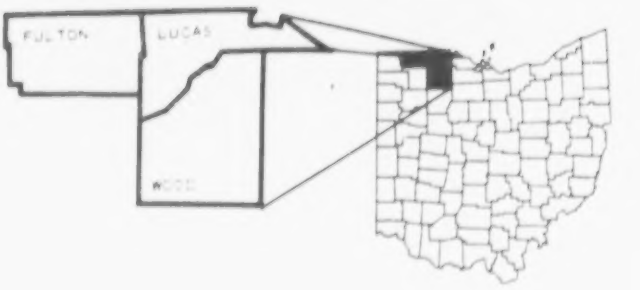
TOLEDO
METROPOLITAN STATISTICAL AREA



In November, Toledo's nonagricultural wage and salary employment rose 1,900, to 281,500. Nonmanufacturing employment rose 1,600, to 218,800. A large part of this increase occurred in retail trade, which rose seasonally. Manufacturing employment advanced slightly over the month. Manufacturing production workers earned an average of $12.45 per hour, down $.03 from October. Their average workweek decreased by .5 hours, to 42.1 hours.

Between November 1985 and November 1986 nonagricultural wage and salary employment rose 8,300. This increase occurred in nonmanufacturing industries, with large gains in services (+4,800) and retail trade (+3,400). Manufacturing employment declined by 3,500, with all losses occurring in durable-goods industries. The largest decline was reported in motor vehicles and equipment.

Technical Notes

Civilian Labor Force Estimates

Civilian Labor Force.—Estimated number of persons 16 years of age and over employed or unemployed during week including 12th of month, distributed by place of residence.

Total Employed.—Includes nonagricultural wage and salary workers, the self-employed, unpaid family workers, domestics, agricultural workers, and persons involved in labor disputes. Employment distributed by place of residence.

Total Unemployed.—Estimated number of persons, by place of residence, who did not work during reference week and were looking for work, whether or not eligible for unemployment compensation. Includes those who did not work and were waiting to be called back to an old job or to report to a new job.

Nonagricultural Wage and Salary Employment

Collection.—Nonagricultural wage and salary employment as well as hours and earnings estimates based on monthly reports from a sample of employers. Under cooperative arrangement with U.S. Bureau of Labor Statistics, Labor Market Information Division of Ohio Bureau of Employment Services mails, edits, and processes Ohio reports, which are subsequently incorporated in national data.

Industrial Classification.—Employer establishments classified by industry, on basis of their principal product or service. The Standard Industrial Classification Manual, (U.S. Office of Management and Budget, Washington, D.C., 1972, amended 1977), used for classification.

Coverage.—Monthly reports on employment and, for most industries, payroll and hours obtained from approximately 10,000 Ohio employers.

Coverage of Ohio Nonagricultural Employment Sample

Industry Division	Approximate Percentage Covered by Sample
Total	41
Manufacturing	60
Nonmanufacturing	35
Mining	50
Construction	20
Transportation and Public Utilities	41
Wholesale Trade	19
Retail Trade	21
Finance, Insurance, and Real Estate	44
Services and Miscellaneous	24
Government	70

Nonagricultural Employment.—Persons who worked during, or received pay for, any part of pay periods which include 12th of month, distributed by place of employment. Includes persons on paid sick leave, paid holiday, or paid vacation. Excluded are persons laid off, on strike, or on unpaid vacation during entire reporting period. Proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers also excluded. Government employment covers only civilian employees. Full-time teachers considered employed during the summer vacation period, whether or not paid in those months.

Estimating Method.—Total employment is estimated from the employment of establishments reporting for two consecutive months, as follows:

$$\text{Total Employment (current month)} = \text{Total Employment (previous month)} \times \frac{\text{Sample Employment (current month)}}{\text{Sample Employment (previous month)}}$$

Benchmark Data.—Employment estimates compared annually with complete count of employment by industry. Where revisions necessary, monthly estimates adjusted to new benchmark. Following revisions to new benchmark, industry data projected forward to current month by use of sample trends. Basic source of benchmark information is tabulations of employment data, by industry and area, compiled from contributor reports of employers covered under Ohio Unemployment Compensation Law. Data are based on March 1985 benchmark.

Seasonally Adjusted Estimates

To facilitate interpretation of underlying economic trends, Civilian Labor Force and Division and Nonagricultural Wage and Salary Employment series are presented with short-term effects of seasonal patterns removed. For method, see January 1981 issue.

Hours and Earnings

Method of Computing Averages.—Average hours computed by dividing total production worker hours worked during one week (the seven-day period which includes 12th of month) by number of production workers reported for such week. Average hourly earnings computed by dividing total production worker payroll for one week by total production worker hours for week. Average weekly earnings derived by multiplying average hourly earnings by average weekly hours.

Definitions.—Definitions of production and nonsupervisory workers (NSW) and hours (for which average hours and earnings data are derived) follow:

Production Workers.—Includes working supervisors and all nonsupervisory workers, including group leaders and trainees, engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, and guard services, product development, auxiliary production for plant's own use (such as power plant), and record keeping and other services closely associated with production operations.

Nonsupervisory Workers.—Includes employees (non-supervisory working supervisors) such as office and clerical workers, repairers, salespersons, operators, drivers, attendants, service employees, line installers, laborers, accountants, janitors, guards, and other employees whose services are closely associated with those of occupations listed.

Payroll.—Represents payroll for full- and part-time production, construction, or nonsupervisory workers who received pay for any part of pay periods which include 12th of month. Payroll is reported before deductions for Social Security, group insurance, withholding tax, bonds, and union dues; also includes pay for overtime, holidays, vacations, and sick leave paid directly by the firm. Bonuses (unless earned and paid regularly each pay period), tips, pay not earned in pay period reported (such as retroactive pay), and value of free rent, fuel, meals, or other payments in kind excluded.

Hours.—Represents hours worked or paid for during pay periods which include 12th of month, for production, construction, or nonsupervisory workers. Hours include time paid for holidays and vacations, and for sick leave when pay received directly from firm.
